

Список публикаций с оборудованием Orsay Physics

- [1] J.J. Jimenez, P. Sudraud, A. Septier
Frequency stabilisation of a reflex-klystron oscillator by a superconducting cavity
Electronics Letters 7 (1971) 153
- [2] J. Bénard, N. Viet, P. Sudraud et al.
Frequency-stability improvement in a klystron stabilized by a superconducting cavity
Electronic Letters 8 (1972) 117
- [3] J.J. Jimenez, J. Bénard, P. Sudraud et al.
Attainment of a low-noise high power and highly stable gun oscillator by coupling to a superconducting cavity
Proceedings IEEE 61 (1973) 123
- [4] P. Sudraud, J. Van de Walle, C. Colliex et al.
Contribution of field effects to the achievement of higher brightness ion sources
Surface Science 70 (1978) 392
- [5] P. Sudraud, C. Colliex, J. Van de Walle
Energy distribution of EHD emitted gold ions
J. Phys. Lettres 40 (1979) L207
- [6] P. Sudraud, J. Van de Walle, C. Colliex, P. Trebbia
Characterization of the ion emission from a Taylor Cone of liquid gold
Ultramicroscopy (1979)
- [7] A. Dixon, C. Colliex, P. Sudraud et al.
Field evaporation of impurity ions from a liquid gallium ion source
Surface Science 108 (1981) L424
- [8] A. Dixon, C. Colliex, R. Ohana et al.
Field-ion emission from liquid Tin
Phys. Rev. Lett. 46 (1981) 865
- [9] G. Benassayag, P. Sudraud
LMIS energy broadening interpretation supported by HV-TEM observations

- J. Phys. 45 (1984) 223
- [10] J. Van de Walle, P. Joyes, P. Sudraud
A study of NiCuⁿ⁺ and NiAuⁿ⁺ (n less than 10) clusters obtained by field evaporation
J. Phys. 45 (1984) 211
- [11] G. Benassayag, P. Sudraud, B. Jouffrey
In situ high voltage TEM observation of an electrohydrodynamic (EHD) ion source
Ultramicroscopy 16 (1985)
- [12] P. Joyes, P. Sudraud
Properties of noble metal cluster ions XNP (X=Cu, Ag, Au, N less than 20, p = -1, +1, +2) investigated by LMIS technique
Surface Science 156 (1985) 451
- [13] J. Orloff, P. Sudraud
Design of a 100kV, high resolution focused ion beam column with a liquid metal ion source
Microelectronic Engineering (1985)
- [14] P. Joyes, J. Van de Walle, P. Sudraud
Theoretical study of the odd-even alternance effect appearing on the stabilities of XNP⁺ ions (X noble metals, P = 1, 2, N less than or equal to 8)
J. Phys. 47 (1986) 789
- [15] P. Sudraud, J. Orloff, G. Benassayag
The effect of carbon bearing gases and secondary electron bombardment on a liquid metal ion source
J. Phys. 47 (1986) 381
- [16] G. Benassayag, P. Sudraud, L.W. Swanson
Close-spaced ion emission from gold and gallium liquid metal ion sources
Surface Science 181 (1987) 362
- [17] P. Sudraud, G. Benassayag, M. Bon
Focused ion beam repair in microelectronics
Microelectronic Engineering (1987)
- [18] P. Sudraud, P. Bal.longue, E. Varoquaux et al.
Focused ion beam milling of a sub-micrometer aperture for a hydrodynamic Josephson effect experiment
J. Appl. Phys. 62 (1987) 2163

- [19] P. Sudraud, G. Benassayag
Focused Ion Beams for Optoelectronic Technology: a review
Symposium on the Technologies for Optoelectronics (1987)
- [20] G. Benassayag, P. Sudraud, F. Alaoui, L.W. Swanson
Metal droplet beams in M.E. technology: Production, focusing and deposition
Microelectronic Engineering (1987)
- [21] P. Sudraud, G. Benassayag, M. Bon
Focused-ion-beam milling, scanning-electron microscopy and focused-droplet
deposition in a single microcircuit surgery tool
J. Vac. Science & Technology B 6 (1988) 234
- [22] G. Benassayag, P. Sudraud
Metal-ion and cluster beams for microelectronic research and development: a
review
Scanning Microscopy 2 (1988) 1329
- [23] D. Remiens et al.
GaAs/AlGaAs double heterostructure laser monolithically integrated with
passive waveguide using focused ion beam etching
Proceedings of SPIE – The International Society for Optical Engineering (1989)
- [24] G. Benassayag et al.
Focused ion beam machining of mirror facets of a monolithically integrated
GaAs/GaAlAs double heterojunction (DH) laser and its optical waveguide
Microelectronic Engineering (1990)
- [25] M. Benguerba, A. Brunelle, S Della-Negra et al.
Impact of slow gold clusters on various solids: nonlinear effects in secondary ion
emission
Nuclear Instruments and Methods B 62 (1991) 8
- [26] G. benassayag et al.
New characterization method of ion current-density profile based on damage
distribution of Ga⁺ focused-ion-beam implantation in GaAs
Journal of vacuum science & technology. B, B11(6):2420-2426 (1993)
- [27] P. Sudraud
Ion Nanoprobes
Biology of the Cell 91 (1999) 227-280
- [28] C. –C. Tsao et al.
Coaxial Ion-Photon System

- Microelectronics Reliability (2001)
- [29] M Prestigiacomo et al.
Studies of structures elaborated by focused ion beam induced deposition
Microelectronic Engineering (2004)
- [30] M Prestigiacomo et al.
Purification and crystallization of tungsten wires fabricated by focused-ion-beam-induced deposition
Applied Physics Letters (2005)
- [31] A. Reguer, F. Bedu, D. Tonneau et al.
Structural and electrical. studies of conductive nanowires prepared by focused ion beam induced deposition
J. Vac. Science & Technology B 26 (2008) 165
- [32] H. Dellaporta, M. Prestigiacomo, F. Bedu et al.
Electric field induced motion of metallic droplets: application to submicron contactor
J. Vac. Science & Technology B 28 (2010) L35
- [33] I.C. Marcus, I. Berbezier, A. Ronda et al.
In-plane epitaxial. growth of self-assembled Ge nanowires on Si substrates patterned by a focused ion beam
Crystal. Growth & Design 11 (2011) 3190
- [34] Y. Bruneau et al.
Using cold atoms as a bright cw source for monochromatic ion and electron beams
APS Division of Atomic, Molecular and Optical Physics Meeting Articles (2011)
- [35] M. Aouassa, I. Berbezier, L. Favre et al.
Design of free patterns of nanocrystals with ad hoc features via templated dewetting
App. Phys. Lett., 101 (2012) 013117
- [36] P. Sortais et al.
Technical use of compact micro-onde devices
The Review of Scientific Instruments (2012)
- [37] I. Berbezier, M. Aouassa, A. Ronda et al.
Ordered arrays of Si and Ge nanocrystals via dewetting of pre-patterned thin films
J. Appl. Phys. (2013)

- [38] M. Lesik, et al.
Maskless and targeted creation of arrays of colour centres in diamond using focused ion beam
Phys. Status Solidi A 210, No 10, 2055-2059 (2013)
- [39] A. Benkouider et al.
Ultimate nanopatterning of Si substrate using filtered Liquid Metal. Alloy Ion Source – Focused Ion Beam
Thin Solid Films (2013)
- [40] M. Aoussa et al.
Engineered core-shell $\text{Si}_{1-x}\text{Ge}_x/\text{Ge}$ nanowires fabricated by focused ion beam and oxido-reduction
Journal of Applied Physics 114, 034301 (2013)
- [41] E. Ruiz-Gomes et al.
Electroless selective deposition of gold nano-array for silicon nanowires growth
Published online: 2013-09-10
- [42] L. Klime et al.
High-flux monochromatic ion and electron beams based on laser-cooled atoms
Physical Review A88, 033424 (2013)
- [43] A. Benkouider et al.
Selective growth and ordering of SiGe nanowires for band gap engineering
Nanotechnology 25(33):335303 (2014)
- [44] G. N. Misevic et al.
Design and construction of wall-less nano-electrophoretic and nano in micro array high throughput devices for single cell 'omics' single molecule detection analyses
Journal of Molecular Structure 1073:142-149 (2014)
- [45] A. Benkouider et al.
Ordered arrays of Au catalysts by FIB assisted heterogeneous dewetting
Nanotechnology 26(50) (2015)
- [46] M. J. Eller et al.
Andromede project: Surface analysis and modification with probes from hydrogen to nano-particles in the MeV energy range
Nuclear Instruments and Methods in Physics Research B 365 (2015) 367-370
- [47] M. Viteau et al.
Ion microscopy based on laser-cooled cesium atoms

Ultramicroscopy (2016)

- [48] M. Naffouti et al.
Templated solid-state dewetting of thin silicon films
Small (2016)

- [49] I. Berbezier et al.
LMAIS nanofabrication of core-shell SiGe/Ge nanowires
Nanotechnology (2016)

- [50] S. Guillous et al.
A new setup for localized implantation and live-characterization of keV energy multiply charged ions at the nanoscale
Review of Scientific Instruments 87, 113901 (2016)

- [51] G. Shayeganrad et al.
Low-energy ions from laser-cooled atoms
Physical Review Applied 5, 054020 (2016)
